

Visual Paradigm for UML 10

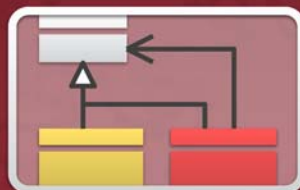

Model-Code-Deploy Platform

version 10.0

Release Date: June 18, 2012

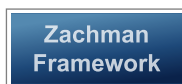

Requirements
Capturing

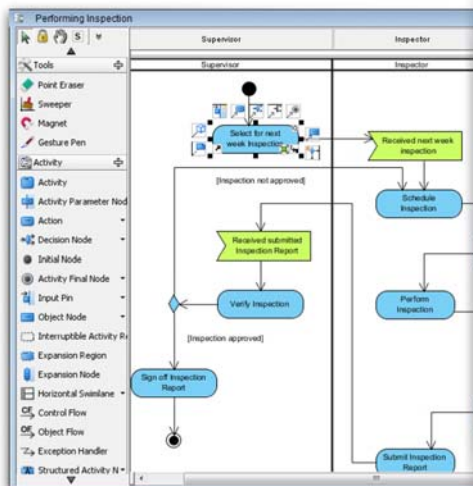

Software Design

Database and Code
Generation

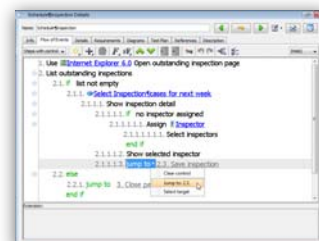

What VP-UML Provides

UML Modeling

Design quality software systematically with UML 2.4.

Use Case Modeling

Document how use cases get done, step-by-step with the flow of events editor.

Enterprise Architecture

Describe business architecture graphically with Zachman Framework.

Requirement Modeling

Visualize system requirements for ease of management and communication.

Glossary Management

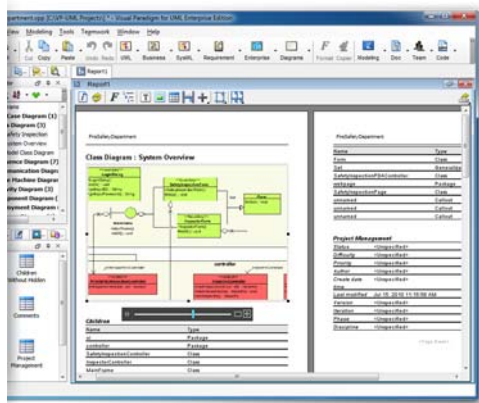

Record and describe project vocabularies.

Business Process Modeling

Capture, analyze and improve business workflow with BPMN, Process Map and DFD.

What VP-UML Provides

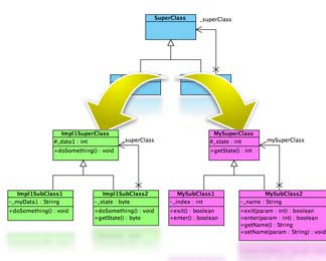

Documentation Generation

Produce professional system specifications in MS Word, PDF and HTML.

Team Collaboration

Design software concurrently with VP Teamwork Server, Subversion, Perforce®, ClearCase® and CVS.

Design Pattern

Manage, reuse and share repeated designs with the design pattern function.

Code Engineering

Generate, reverse and round-trip Java and C++ in seconds.

RACI & CRUD Chart

View model from different angles using Chart Diagram.

Impact Analysis

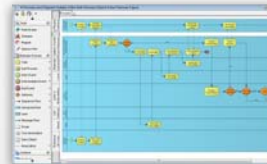

Avoid unexpected consequences by studying Matrix and Analysis Diagram before change.

Build quality software faster, better and cheaper

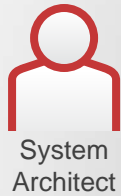

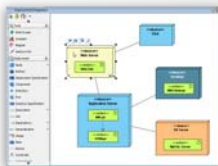

Understand Your Business

Capture business workflow

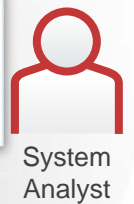

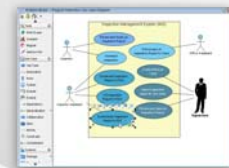

Deployment

Deployment diagram

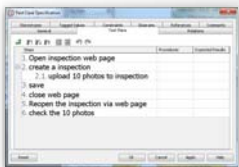

Turn Process to Requirements

Capture requirements
Design user interactions
Capture user goals

Testing

Test planning

Analysis and Design

Composite Structure Modeling
Architecture Modeling

Structural Modeling
Behavior Modeling

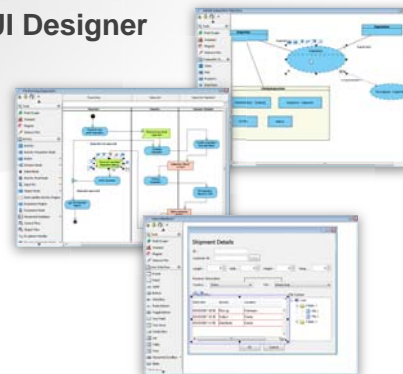

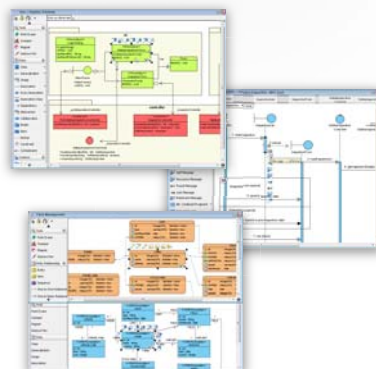

UI Designer

Implementation

Implementation Class Diagram
Dynamic Modeling

Database Design
Database generation

Visual Paradigm for UML 10.0
